ROHTO GROUP POLICY FOR WATER RESOURCE CONSERVATION

The ROHTO Group's business activities require a certain amount of water usage. Acknowledging that our business is closely related to water resources and their efficient use is our social responsibility, we will engage in environmental conservation activities through the whole business process, such as the effective utilization and the reduction of the usage of water resources, and the prevention of water pollution.

1. Through our business activities, considering water-related risks, we will strive to utilize water efficiently and reduce its usage by promoting the appropriate use, water recycling, and other approaches throughout the business processes.
2. We will strive to reduce the environmental impact by advancing the proper management and treatment of wastewater.
