ROHTO GROUP CHEMICAL SUBSTANCE MANAGEMENT POLICY

As set out in “Environment Basic Policy,” the ROHTO Group has been working to advance the appropriate management and the reduction of chemical substances that affect the environment, as well as reducing the usage of those substances by replacing them with alternative materials. Acknowledging the importance of safeguarding customers' and employees' safety and ensuring their peace of mind, together with protecting the environment and community safety, we aim to contribute to a sustainable society by following various laws and ordinances and managing chemical substances properly.

1. We will reduce environmental impact by properly managing chemical substances throughout the life cycle of our products.
2. Gathering information on the trend of domestic and international regulations and safety regarding chemical substances, we will offer products that our customers can use without any safety concerns. Also, we will monitor and assess the status of the customers' usage of our products and confirm the products' safety.
3. We will ensure the assessment of risks associated with the treatment of chemical substances to prevent our employees from suffering any health problems, as well as severe disasters and accidents.
4. We will clearly and comprehensively provide society with information regarding the usefulness and safety of chemical substances and the safe usage of our products.
